1. Customer chat: question to booking

Customer's phone (WhatsApp; Instagram and Messenger look the same)

What happens behind the scenes

1. **Reply in seconds**
   Chatwoot passes the message to n8n, which asks the AI service. The answer comes from the price list in the admin panel.
2. **Real availability**
   The AI checks the Google Calendars of practitioners who do this treatment and offers only free slots.
3. **Lead saved**
   As soon as name and phone are given, a lead is saved and scored (here: hot).
4. **Booking confirmed**
   A calendar event is created on Amy's calendar. The booking appears in the admin panel.
5. **Reminders**
   n8n sends reminders 24 hours and 2 hours before. Outside WhatsApp's 24-hour window, an approved template is used.

2. Staff inbox (Chatwoot)

Staff on desktop or the Chatwoot mobile app

Resolve

I had the laser last week and my skin is red and itchy. Is that normal?
14:20

[Bot] I'm sorry to hear that. I'm connecting you with our team now.
14:20

PRIVATE NOTE · AI SUMMARY (CUSTOMER CANNOT SEE)

Reason: medical concern. Customer had pigmentation laser 7 days ago, reports redness and itching. No booking pending. Language: English. Lead score: warm.

[Dr. Sarah] Hi Mei, could you send a photo of the area?
14:26

Sure, sending now
14:27

Edit | Test calendar

Tomorrow (read from Google Calendar)

Time	Dr. Sarah	Amy	Jenny
10:00		Facial · Mei	
11:00	HIFU · Priya		
13:00	Lunch (blocked)	Lunch (blocked)	
14:00	Laser · Chloe		

How the calendar link works

1. Practitioner shares their Google Calendar with the clinic's service account.
2. Paste the calendar ID here and press **Test calendar**.
3. The bot now offers only free slots and writes new bookings as events.

Anything staff block in Google Calendar (lunch, leave) is never offered to customers.
